PROFESSIONAL SUMMARY

Product Designer with 15 years designing enterprise applications and design systems for AWS, Red Hat, and high-growth B2B companies. Core contributor to the PatternFly open-source design system and lead designer for Amazon's internal issue management platform. Expert at turning complex, data-intensive workflows into intuitive interfaces, including recent work designing agentic and AI-assisted experiences.

I bring three strengths beyond craft: I code production-quality prototypes in HTML, CSS, and React to validate designs and speed up engineering collaboration; I bring product management experience in roadmapping and prioritization; and I bridge design, engineering, and stakeholders.

SKILLS & EXPERTISE

Design & Research: Design Systems · Interaction Design · Information Architecture · Prototyping · User Research · Usability Testing · Journey Mapping · A/B Testing · Accessibility (WCAG 2.1 AA) · Responsive Design

AI & Agentic Design: Agentic Chat Interfaces · MCP Architecture · AI/LLM Tooling and Prompt Design · AI Governance Patterns

Product: Roadmapping · Feature Prioritization · Cross-functional Leadership · Stakeholder Management · Agile

Tools & Technical: Figma · FigJam · Storybook · Miro · Maze · UserTesting · HTML5 · CSS3 · React · JavaScript · TypeScript · Design Tokens · Radix UI · SwiftUI/SwiftData · Docker · GitHub

PROFESSIONAL EXPERIENCE

Lead Product Designer & Product Manager | Jan 2024 to Present

Component Assembly Systems, Inc., Pelham, NY

- Built the company's first comprehensive design system on Radix UI primitives, with reusable components, design tokens, and documentation spanning web and iOS applications.
- Led the complete redesign of an enterprise information management system for tracking employees, supplies, and payroll across multi-site construction operations.
- Redesigned in-house iPad app for on-site construction management, moving field teams from paper-based workflows to digital data entry, improving accuracy and real-time visibility.
- Designed and built CASim, an internal AI product assistant, and its agentic chat system (Agent Center), which increased active sessions 15%, drove more queries, and cut time spent searching for information by 20%.
- Built an MCP server with cached data that reduced average SQL query times by 45 seconds.
- Authored an MCP-based governance framework for scoping enterprise AI tool access and presented it to IT leadership under the framing "gate the connectors and data scope, not the creativity," using a live 11-tool MCP server as the reference model.
- Built a Now/Next/Later prioritization application that uses AI analysis of item descriptions to score work against custom criteria, reducing planning churn by two meetings a week and improving planning timeline accuracy.
- Created full-scale interactive prototypes in HTML, CSS, and React to validate designs with users before engineering investment.
- Led a build vs. buy evaluation for an internal estimating tool, delivering a working prototype, estimator requirements, and competitive analysis that informed the in-house build decision.
- Implemented WCAG 2.1 accessibility standards across all products and modernized data visualization to surface critical project insights for managers.

Senior UX Designer | Aug 2021 to Sep 2023

Amazon Web Services, Boston, MA

- Lead designer for Task-it (Amazon Issue Management), consolidating 3 to 4 disparate tracking tools into one platform that reached 500 daily active users across 15+ AWS teams within 18 months of launch.
- Drove product vision and roadmap through continuous user research, usability testing, and feedback from product managers, engineers, and support teams.
- Designed scalable, role-agnostic UX patterns and a unified information architecture that eliminated context-switching between legacy tools.

- Built interactive prototypes in Figma and React to validate concepts before engineering investment, and partnered with engineering through QA to protect design quality.

Senior Interaction Designer | Jul 2016 to Aug 2021

Red Hat, Inc., Westford, MA

- Core contributor to PatternFly (20,000+ GitHub stars), Red Hat's open-source design system used across all Red Hat products and adopted by external organizations.
- Designed accessible, enterprise-grade components serving millions of developers worldwide.
- Created and launched the Red Hat Developer Design Manual, a pattern library that centralized design documentation and accelerated consistent UI implementation.
- Championed WCAG 2.1 AA, conducting audits and working with engineers across the product suite. Contributed HTML, CSS, and Jekyll code to kubernetes.io and [OpenShift.io](https://openshift.io).

UX Designer | 2014 to 2016

Saylent Technologies, Franklin, MA

- First in-house UX designer for the Account360 and Card360 financial SaaS platforms; established design processes and a reusable UI pattern library that cut design-to-development time by 40%.
- Conducted user research and usability testing to inform product strategy for interfaces serving credit unions and regional banks.

INDEPENDENT PROJECTS

Founder & Product Designer, Brimfield Labs | 2026 to Present

Independent app studio building local-first, privacy-focused consumer applications

- **TaskStat:** Privacy-first iOS task management app with smart organization and project management, available on the App Store.
- **Timetraked:** Time-tracking app available as a PWA and as native macOS and Windows desktop apps, with an AI-generated weekly report feature.
- **Brimfield Soccer:** SwiftUI/SwiftData iOS coaching app for volunteer youth soccer coaches, with a full Figma design system implemented across data, view, and navigation layers.
- **MCP Server:** Custom MCP server (TypeScript, dual stdio and Streamable HTTP transport, 11 registered tools) running on self-hosted Docker infrastructure, later used as a governance case study in enterprise AI tooling discussions.

EARLY CAREER

Product Designer & Part Owner, Switchback, Inc. | 2010 to 2014 (full-time), 2023 to Present (contract)

UI Software Engineer, Black Duck Software | 2013 to 2014

EDUCATION & AFFILIATIONS

Massachusetts College of Liberal Arts: B.A. Fine and Performing Arts, B.A. Arts Management, Minor in Business Administration
PatternFly Design System, Core Contributor (2016 to 2021) | UXPA Boston, Member (2017 to Present) | W3C Working Group, Contributor (2020 to 2021)
